

AERODYNE CASE STUDY

CLIENT: Carlsberg/Gist Logistics

SECTOR: Logistics Company for Carlsberg

VEHICLE TYPE/S: Scania Tractor Unit

BRIEF: To improve the aerodynamics on tractive unit pulling excessively high trailers where the factory supplied kit was not dimensionally adequate.

SOLUTION: Aerodyne utilised and fitted the very highest combination available for the Scania range to deflect air better over the top of the trailer.

Reported Results	Fuel Saving
Improvement over factory fitted kit	2-3%
