

AERODYNE FUEL-SAVING CASE STUDY

CLIENT: Kerry Foods

VEHICLE TYPE/S: 3.5tonne Ford Transit with refrigerated box body

RESULTS:

Aerodyne has been working in conjunction with Kerry Foods, a leading fleet operator in the global food market trialing a fuel-saving cab top deflector.

The vehicle was tested for a period of weeks with and without the deflector, resulting in an increase from 19.1 to 21.5MPG, which is 11.2% fuel-saving!

These results show how much fuel can be saved with LCV vehicles such as a Ford Transit 3.5 ton fridge truck.

Vehicle Type	MPG Before	MPG After	Fuel Saving (%)
Ford Transit	19.1	21.5	11.2%
